Paediatric and  
adolescent  
gynaecology

# Dear patient!

Welcome to our gynaecological practice!

We are pleased that you have taken this step, which we appreciate is not always an easy one. Please be assured that, once the hurdle of the first visit is overcome, most girls return for their next appointment happily and without hesitation.

Our practice philosophy is to offer the latest and most up-to-date diagnosis and treatment methods, with a focus on providing answers to any questions or problems you may have. You will find our team members friendly and helpful, and good appointment planning ensures that waiting times at our practices are generally kept below 30 minutes.

## Services

- Advice and consultation on all questions about your period, period pain, acne, contraception, sexuality and any problems associated with it
- Prescription of a low-dose contraceptive pill that poses no risk of weight gain
- Information about your monthly cycle, sexual health, the contraceptive pill and its side effects
- HPV (Human Papilloma Virus) immunisation for girls from 12 years onwards
- Chlamydia screening
- Prescription of the morning-after pill
- Pregnancy testing, HIV testing

For longer stays abroad, we can also offer consultation by email at: [info@dr-liebmann.de](mailto:info@dr-liebmann.de).

## What we would like you to do:

If you are on the pill we would like to see you every six months. This is mainly to check whether there are any problems. Please also tell us if you have taken up smoking. (This is important!)

If you need the morning-after pill this has to be taken within 72 hours. So, please contact us as soon as possible. Alternatively, hospital Accident & Emergency units can also issue a prescription for the morning-after pill.

We pride ourselves in the smooth running of our appointment system and would therefore ask you to please let us know in good time if you cannot make an appointment. Please note that after two failed appointments without notifying us, we will regrettably have to refuse further treatment.
